

Location Kingston, Tasmania
Type Residential Subdivision
Size 210 Dwellings
Year 2001
Status Under Construction

Kingston Green is a Master planned residential community development based on planning and design principles, which;

- Work with the landform in the layout of roads and allotments
- Incorporate significant site features
- Carefully consider natural systems
- Provide appropriate housing in sensitive areas
- Has a lot layout which maximises solar access to private open space
- Provides an innovative approach to subdivision and dwelling layout

Stage one of the development is complete and consists of single storey dwellings.

Design Guidelines applicable to the whole site were instrumental in achieving the desired outcome.
