

The resort residential zoning of this magnificent stretch of coastal land along the eastern edge of Tasmania enabled the formation of a concept where the natural qualities of the site could be utilised as a setting to a resort/residential development.

The residential development would consist of a redefined contemporary holiday dwelling in the form of 'Smart Shack', whilst the attraction of a serviced resort facility is used as a central feature facilitating development overall.

It is intended that the principles of sustainability, similar to 'Green Globe' approach be upheld in the approach to design and running of the development.

Location Bicheno, Tasmania
Type Resort/Recreation
Size 15ha
Year 2004
Status Conceptual
